

# Painter Alhaj

Full Stack (Mern) Developer  
Surat, Gujarat, India | [painteralhaj@gmail.com](mailto:painteralhaj@gmail.com) | 9737215041

## Professional Summary

Results-driven Senior MERN Stack Developer and Team Leader with expertise in architecting, developing, and deploying scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in designing secure RESTful APIs, backend architectures, and performance-optimized frontend interfaces. Proven track record in technical leadership, code reviews, and delivering clean, maintainable solutions aligned with business goals.

## Professional Experience

### React Js Developer at Sridix Technology, Surat

Aug 2024 to Jan 2025

Worked as a React Developer Intern. Gained hands-on experience in component-based architecture, state management (including Redux), API integration, and responsive design to enhance user experience. Collaborated with the team to implement features, debug issues, and ensure seamless functionality across different devices.

### Mern Stack Developer at Tenacious Techies, Surat

May 2025 to Sept 2026

Designed and developed responsive, high-performance web applications using Next.js, TypeScript, Node.js, Express.js, and MongoDB. Built secure RESTful APIs, implemented role-based access control (RBAC), and architected scalable database schemas. Optimized frontend performance and user experience, while collaborating with cross-functional teams to deliver production-ready features on schedule and mentoring junior developers.

## Areas of Expertise

- |              |              |           |                |
|--------------|--------------|-----------|----------------|
| • Javascript | • Typescript | • React   | • Next.js      |
| • Node       | • Express.js | • MongoDB | • Tailwind CSS |
| • MySQL      | • Git        |           |                |

## Education

### BCA (Bachelor of Computer Application), Surat

Veer Narmad South Gujarat University, Jun 2021 to Apr 2024

## Projects

### Foodchow — Restaurant Marketplace & Ordering Platform

[Project Link](#)

FoodChow is a global restaurant marketplace and food ordering platform that connects customers with restaurants, enabling them to discover nearby restaurants, explore menus, and place orders through delivery, takeaway, and dine-in services. Served as Senior MERN Stack Developer and Team Leader, developing scalable applications with React.js, Node.js, Express.js, and MongoDB, including secure RESTful APIs, authentication, authorization, and validation. Integrated global payment gateways (Stripe, Stripe Connect, Razorpay, PayPal) and delivery providers (Uber Direct, Porter, Lalamove). Implemented Google Maps API for worldwide location search, restaurant discovery, mapping, and delivery radius calculations. Optimized SEO and performance, maintained coding standards through code reviews, and collaborated directly with clients on technical requirements.

### WhatsApp Business Automation

[Project Link](#)

WhatsApp automation and messaging SaaS platform designed to help businesses manage contacts, templates, campaigns, and automated customer communication through the Meta WhatsApp Cloud API. Developed a scalable WhatsApp automation SaaS platform using Next.js, TypeScript, Node.js, Express.js, MongoDB, and Tailwind CSS, featuring secure RESTful APIs with authentication, authorization, validation, rate limiting, and centralized error handling. Integrated the Meta WhatsApp Cloud API for automated messaging, template synchronization, and customer campaigns, with Socket.IO for real-time updates. Maintained clean modular architecture, optimized database queries, and production-ready, high-performance code.
